

Dynaudio Xeo firmware update instructions

Requirements:

- Empty USB stick, formatted to FAT32
- The latest firmware file downloaded from <http://www.dynaudio.com/support/firmware/>

Steps:

1. Unzip the downloaded Zip file
2. Copy the *.bin firmware file onto the USB stick.
3. Remove the power cable from the loudspeaker.
4. Insert the USB stick into the USB port at the rear panel labeled Service.
5. Reconnect the power cable
6. The loudspeaker will automatically upload the firmware from the USB stick.
7. Important: After this, allow the speaker to install the full update during the next 1-3 minutes. **DO NOT POWER OFF THE SPEAKERS.**
8. During this update the white LED will blink slowly then faster and faster until the update is finished.
9. After installation, the speaker will return to standby.
10. Firmware update procedure is now finished, and the USB stick can be removed. Please note: The firmware update must be performed on both speakers!
11. After firmware update is completed, disconnect and reconnect power to the speaker.
